## **Two UFSI Prime Contractors Win SSC-Atlantic C2 COTS IDIQ**

**July 11, 2011 (RESTON, VA)** – Two Prime Contractors, with whom **United Federal Systems, Inc. (UFSI)** has teamed, has been awarded Prime Contracts with the Space and Naval Warfare Systems Center (SSC) – Atlantic for **the COTS Command and Control (C2) Support Equipment (C2 Supply MAC)**. The Prime Contractors are **Scientific Research Corporation (SRC)** and **MERCOM Corporation**. Each contract is a \$100,000,000 IDIQ, firm-fixed-price, supply contract for the procurement of commercial-off-the-shelf products, command and control equipment and related incidental support services. The contracts include options, which, if exercised, will bring the cumulative value of each contract to an estimated \$500,000,000 through June 2016. UFSI suite of tactical and mobile servers, workstations and peripherals were part of the offerings. These contract vehicles allow UFSI and their Primes and teammates the access necessary to support existing and future contracts.

SSC - Atlantic is responsible for the acquisition, integration, fielding and logistics support of Command, Control, Communications, Computers, Intelligence, Surveillance, Reconnaissance (C4ISR) systems for the Department of Defense (DoD) and Civil Federal Agencies throughout Government. The purpose of this procurement is to provide SPAWARSYSCEN Atlantic with rapid access to turnkey solutions to the warfighter with the objective of fostering improvement initiatives that include mission effectiveness, efficient utilization of resources, and volume discounts.

### **About United Federal Systems**

United Federal Systems, Inc. (UFSI) is a leader in tactical computing technologies and engineering services providing high performance C4ISR tactical solutions since 1989. Services include custom hardware design and rapid prototyping, OEM manufacturing, system engineering, development and COTS integration, installation, fielding and training, and post-fielding support. Our **OPTIA**<sup>®</sup> brand of rugged hardware systems and products includes rack-mount and portable servers, workstations, monitors, and storage units. For further information on how UFSI can help with your C4ISR solution needs please send inquiries to [info@optia.com](mailto:info@optia.com) or contact us directly at (703) 956-9377.
