United Federal Systems wins Tactical Exploitation Group Remote Workstation

September 20, 2010 Reston, VA United Federal Systems (United) has been selected to build the next generation of the Tactical Exploitation Group (TEG) Remote Workstation (RWS). The TEG System is the only tactical imagery exploitation system in the United States Marine Corps (USMC) and is one of the five systems that make up the DCGS-MC. The TEG RWS will provide the MAGTF and Joint Task Force commanders with an inherent capability to produce IMINT in support of operations. The TEG System employs Commercial-Off-The-Shelf/Non-Developmental Items (COTS/NDI) computer hardware/software (HW/SW) to enable rapid upgrade and maintain commonality with Marine intelligence and Joint imagery systems.

United will deliver 151 TEG RWS systems to SPAWAR Charleston, SC. The systems will be dual screen, ruggedized, tactical workstations to be used by imagery analysts in garrison, field, shipboard operations, and exercises. The HW configurations will enable rapid upgrades and maintain commonality with Marine intelligence and Joint imagery systems.

For further information on the TEG RWS or to find out how **OPTIA**[®] can help with your rugged HW needs please send inquiries to info@optia.com or contact us directly at (703) 956-9377.

About United Federal Systems

United Federal Systems, Inc. is a leader in tactical computing technologies and engineering services providing high performance tactical solutions since 1989. Services include custom hardware design and rapid prototyping, OEM manufacturing, system engineering and COTS integration, installation, fielding and training, and post-fielding support. United's **OPTIA**[®] brand of rugged hardware systems and products, includes rack-mount and portable servers, workstations, monitors, storage units and notebooks.

OPTIA[®] is a registered trademark of United Computer Products Co., Inc.
